

A two-page (maximum) cover letter indicating interest in and qualifications for serving on NASA-DARES TF2, including relevant scientific, technical, and management experience as it relates to the nine Focus Areas (Focus Area 9: Astrobiology in Society) or similar strategic planning activities.

The cover letter may also describe prior contributions to NASA, the National Academies of Sciences, Engineering, and Medicine, or other community-based strategic planning efforts. Applicants who are willing to serve as a Co-Chair or Focus Area Lead should clearly state their interest and provide a rationale for why they are well suited for the role, referencing specific expertise, leadership skills, and relevant experience.

Maximum document length is 2 pages with a font size 12, not to exceed 15 characters per horizontal inch, including spaces, sans serif font recommended. Section page limits are not transferrable. Testing a citation here (Yeo et al., 2022).

I am writing to express my strong interest in serving as a NASA Decadal Astrobiology Research and Exploration Strategy (DARES) Task Force 2 member. My background, expertise, and leadership in science communication aligns well with Focus Area 9 (Astrobiology in Society) of NASA-DARES.

- Interest in continuing the conversations and work that I began as part of the CDSLU Steering Committee.
- Qualifications: Science communication researcher and expert. Add expertise and research interests. Reference *PUS* paper on #arseniclife.
- Participation on Planning Committee of CDSLU Workshop held in 2024 (check date).
- Contributed to the CDSLU “Workshop Report: Communicating Discoveries in the Search for Life in the Universe.”
- STEMAP Director position as one that is focused on societal impacts of research—offers a bird’s eye view of the societal impacts landscape.
- Served on Steering Committee for SciPEP.
- Serve on Standing Committee for Advancing Science Communication in the National Academies.
- Serve on the Board on Life Sciences in NASEM.
